Name: _____

_____ (2 points)   Files are sent correctly, are appropriately commented and run

When points are assigned to each individual problem, keep in mind that not only accuracy of the answers are factored, but also on the following:

- Output is clear in the command window and there's no extraneous output.

- Plots have appropriate domains and titles, axes are labeled, legends if necessary are clear and markers of points are clear

- Answers on paper interpret correctly the output of MATLAB

1. _____ (8 points)   (4 points each)

2. _____ (16 points)   (4 points each)

3. _____ (24 points)   (4 points each)
