Math 251: Pledged Set 1

Due: January 19, 2010

This is a pledged set. Therefore, no outside help from book, calculator, or other people.

- 1. What is a function? What are its domain and range?
- 2. What is an odd function? How can you tell if a function is odd by looking at its graph?
- 3. If $f(x) = x^2 3x + 1$, evaluate the difference quotient

$$\frac{f(a+h) - f(a)}{h}$$

- 4. Suppose that the graph of f is given. Describe how the graphs of the following functions can be obtained from the graph of f.
 - $\bullet \ y = f(x) + 1$
 - y = f(x+2)
 - y = 1 + 3f(x)
- 5. Find the inverse function of $f(x) = x^4 + 1$.
