When points are assigned to each individual problem, keep in mind that not only accuracy of the answers are factored, but also on the following:

- Files are sent correctly, run and are appropriately commented.
- Output is clear.
- Plots have appropriate domains and titles, axes are labeled, legends if necessary are clear and markers of points are clear
- Answers on paper interpret correctly the output of MATLAB

1. 20 points
   (a) ______ (5 points)
   (b) ______ (5 points)
   (c) ______ (5 points)
   (d) ______ (5 points)

2. 20 points
   (a) ______ (5 points)
   (b) ______ (5 points)
   (c) ______ (5 points)
   (d) ______ (5 points)

3. 10 points
   (a) ______ (5 points)
   (b) ______ (5 points)
